

Not a ripple in your coffee cup

signals the starting of THE PIONEER LIMITED OF THE OLYMPIAN on the Chicago, Milwaukee & St. Paul. Serenely as ocean liners these crack flyers glide into motion. It is friction elimination by means of Timken Bearings which smooths your journey, effects an 88% power saving in starting, and ends the hot box hazard!

More than anti-friction bearings, Timkens permanently protect railroad journals against the effects of shock, side-thrust, speed, and weight. The railroads, like all other industries, find a far higher endurance factor in Timken *POSITIVELY ALIGNED ROLLS*, Timken tapered construction, and Timken-made electric steel.

This exclusive combination of design and material makes it possible to maintain journals permanently trouble-free and wear-proof with the merest fraction of the lubrication and inspection hitherto required. A request gives access to Timken data, and brings any desired engineering counsel.
