Michigan in Summer.

Some of us can't go to Los Angeles; but we need an outing. Fortunately, we have most accessible to us some of the most beautiful woods and waters, sights and scenery, invigorating air, good fishing and delightful boating anywhere to be found.

We don't half appreciate the beauties and benefits of a trip to northern Michigan. Make a little study of it. Get the beautiful pamphlet, "Michigan, in Summer," which will be sent free on application to C. L. Lockwood, Grand Rapids, Mich. It is filled with handsome views of Michigan, My Michigan. Rates are cheap, hotel and cottage accommodations are reasonable. A party of six or ten could have no end of fun, and help body, mind, and soul by a sojourn in July or August at some of our beautiful northern resorts.

The First Anniversary.

It is just a year since the Chicago, Milwaukee & St. Paul road inaugurated its celebrated Pioneer Limited passenger train service between Chicago, Milwaukee, St. Paul and Minneapolis. This service marked a new era in the railway world in the line of passenger accommodations. At a cost of a quarter of a million dollars that progressive company furnished the traveling public, in its Pioneer Limited train, comforts and facilities the best ever produced. This train has been described many times in newspapers and magazines, but should be seen and examined to be appreciated. In beauty of finish, richness and elegance of furnishing nothing equal to it has ever been attempted by any other road. The car builders were nearly a year in completing the Pioneer Limited trains (there are two—one leaving Chicago for the west and the other leaving the Twin Cities for the east every evening in the year) and they stand today a monument to the builder's art. No regular passenger train service in America is as well known as the Pioneer Limited. From the standpoint of passenger traffic the past twelve months have been the most successful in the history of the St. Paul road, made so very largely by the Pioneer Limited. The patronage of this service is a striking illustration of the fact that the public appreciates a good thing.
